📍 Edinburgh

About Me {

Innovative self-taught developer with a solid work ethic and iron discipline, able to build projects from the ground up in an organized and efficient matter. I specialize in front-end development utilizing React ecosystem, able to integrate data from various back-end services, optimize performance, ensure scalability and responsiveness of any web app. Posses a keen eye for detail and a good understanding of graphic design and 3D modelling. I look forward to new challenges and career opportunities, acquire experience and grow as a developer.

Education {

Technical University of Moldova (2004 - 2007): {
Faculty of Computers, Informatics and Microelectronics

Experience {

EedenBull (March 2021 - present): {

- * Refactored UI using React hooks to reduce rerenders improving user page loads by 50%.
- * Integrated the web app with various accounting softwares (MYOB, Xero, QuickBooks).
- * Responsible for the product's look and feel by implementing Figma's prototypes and working closely with UI/UX team.
- * Integrated BankID for electronic identification.
- * Worked hand-in-hand with back-end team when dealing with APIs, making data processing faster.
- * Involved in fault fixing, debugging and writing unit tests (Jest, Mocha).

Personal Projects (late 2019 - 2021): {

- * COFFEEHAUS - SPA built in React, Material UI and Mapbox.
- * EDINFOOD - App designed to query data, filter and display health and safety certifications in Edinburgh area. Built with React, Bootstrap, Mapquest integration and React Router.
- * VIOLETTESTORE - An e-commerce web app for a jewellery shop made with Gatsby, Material UI, GraphQL queries and Strapi.
- * GOOSCHAT - A chat application built with React and Firebase, with google authentication implemented, separate chat rooms and user offline/online presence.
- * TODO-APP - Project built with React/Redux/Material UI to manage your daily tasks.
- * PORTFOLIO - Web app built with React, Material UI, Mapbox, animated 3D meshes created in Blender, that displays all my projects in details.

Video Editor at Sofar Sounds London (2016 - 2018): {

- * Review files, edit raw film footage, color grade and fine-tune video content
- * Use Adobe PremierPro/After Effects, encode, export and maintain files
- * Worked closely alongside director and production team

Skills {

Front-End = [JavaScript, HTML5, CSS3, React, MaterialUI, Redux, Gatsby, NEXT, Sass]

Back-End = [Express, Firebase, GraphQL, REST, Strapi]

Databases = [MongoDB, PostgreSQL]

Other = [Blender, Adobe Illustrator/XD/PremierPro, Git, Figma, ThreeJS, Postman]

Languages = [Romanian, English]
