About Me {

Self-taught developer with a solid work ethic and iron discipline, able to build projects from the ground up in an organized and efficient matter. Always eager to learn and research, highly adapable and quick to grasp new technologies. I specialize in Front-End development utilizing React ecosystem, possess knowledge in graphic design, web animations, basic 3D modelling and a good understanding of back-end web development. Please check my portfolio website for more info.

}

Education {

Technical University of Moldova (2004 - 2007): {
Faculty of Computers, Informatics and Microelectronics (FCIM)
}
}

Experience {

Video Editor at Sofar Sounds London (2016 - 2018): {
* Color grade and fine-tune video content
* Review files and edit raw film footage

}

Worked on various web apps (late 2019 - present): {
* COFFEEHAUS - A single-page application (SPA) made with React JS, Mapbox and Material UI.
* EDINFOOD - Web application designed to query data, filter and display businesses that passed the health and safety check in Edinburgh area.
* VIOLETTESTORE - An e-commerce web application for a jewellery shop made with Gatsby, Material UI,GRAPHQL queries and Strapi as back-end.
* GOOSCHAT - A chat application built with React and Firebase, with google authentification implemented, separate chat rooms and user offline/online presence
* TODO-APP - Web app built with React/Redux/Material UI to manage your daily tasks.
* PORTFOLIO - Website created with React, Material UI, Mapbox integration, created 3D meshes in Blender and used React-Three-Fiber and Drei to load the GLTFs.

}
}
